

Dearborn's Snow Removal Ordinance

- A. Sidewalk
- B. Bus stop
- C. Crosswalk ramp

Dearborn residents and property owners are reminded that they are required to keep sidewalks and ramps clear of snow and ice so they are safe for pedestrian travel.

City ordinance considers sidewalks and ramps unsafe if snow accumulates to three inches or more, or any amount of ice is present. Snow thrown onto the sidewalk as a result of plowing must also be removed.

Property owners are allowed 24 hours (after the snowfall has ended) to remove snow or ice accumulations from public sidewalks and ramps leading to crosswalks.

If properties fail to keep their sidewalks clear and safe, the City may take action to remove the snow and ice. Property owners will then receive a bill from the City for the abatement plus a minimum \$75 additional fee.

Snow removal enforcement is prioritized in areas heavily travelled by pedestrians, such as those near businesses or schools and on walking routes to those areas. However, all properties with public sidewalks are required to remove snow and ice and are subject to enforcement.

Please be a good neighbor and keep your sidewalks free of snow and ice!
