

## **RFP Summary for UAW Project**

The purpose of this project is to plan, design, and manage the installation of green infrastructure improvements at the UAW Local 600 site in southeast Dearborn using Community Development Block Grant–Disaster Recovery (CDBG-DR) funding. The project aims to reduce chronic flooding and stormwater runoff in a flood-prone area by replacing or supplementing aging gray infrastructure with nature-based solutions such as rain gardens, bioretention areas, trees, and other landscape features. In addition to improving stormwater retention and resilience, the project will enhance site aesthetics, deliver environmental benefits, and support long-term community and economic sustainability through a collaborative partnership between the City of Dearborn and UAW Local 600.
